Module:	CSC211 (2026)	Assessment:	Term 2 Practical 2
Lecturer:	Mr. C. K. Baker	Total:	____ / 50 marks
Duration:	Mon 12PM – Sat 12PM		

Student no.

Rubric

	Mark	***Max***	***Feedback***
Question 1 Good file structure and naming conventions. Includes 2 x constructor methods per class. All attributes have accessors and mutators, and attributes are encapsulated/hidden from the user.		**5**	
Question 2 The methods search, insert and delete, height, print_in_order and find_kth_smallest are programmed correctly.		**30**	
Question 3 In Main.java, the input file is processed correctly to execute BST commands. The output for each command is correct; application works on different inputs/edge cases. The code contains no bugs; handles file/input errors correctly during compilation.		**15**
